

Enterprise-grade wireless presentation kit enabling native screen mirroring

Designed for large scale deployments and working through Miracast and Airplay protocol, the ScreenBeam 960 makes it easy to connect your Windows, Android or Apple device to the room display with a single click or swipe. Extended desktop frees up your device for other actions while presenting with both interactive touch displays and it is wireless touch supported.

Central Management System (CMS) software is included for remote management of receivers, providing enterprise-class security and manageability that IT departments need.

The kit contains the ScreenBeam 960A, a mounting bracket and a USB-power cable.
